

July 27, 2026

Dear Customer,

We are contacting you about an upcoming project occurring in Lower Chichester that will enhance the local electric distribution system. This project is part of our continued investment in your community to strengthen the electric system, prevent customer outages, modernize the electric grid, and reduce the impact of extreme weather on electric infrastructure.

What you'll see during this project:

- A temporary cable has been installed to ensure continuous electric service while we get the project ready for execution.
- A machine will be used to install new conduit as well as new underground electrical cable in your area.
 - Any impacted portions of streets will be restored to their prior condition.
- We will be upgrading and installing new, innovative equipment, including new poles and tree-resistant aerial wires, as well as pad-mount transformers could be installed or replaced as necessary.
- Manhole inspections are in progress.
- Work will occur along Ridge Road and Yates Ave.
- Construction will begin August 2026 with an estimated completion December 2026.
- Work will be performed by PECO crews and qualified PECO contractors.
- We have developed a plan to minimize direct customer impact as much as possible and to complete the project in a safe and timely manner.

Crews may need to temporarily interrupt electric service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned interruptions. **To ensure you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at peco.com/MyAccount or by calling PECO at 1-800-494-4000.**

If you have any questions, please contact Mike Herman, Customer Liaison, at Michael.Herman@exeloncorp.com.

Sincerely

PECO
